Delivery Program

Zimmer – the World Market Leader in Digital Jet Printing

Since 1874 Zimmer is working hard to develop, design and manufacture the best finishing machinery for textile, carpet, non woven, paper and other roll to roll substrates.

The activities in the carpet industry started in the early sixties and nowadays this is a major part of Zimmer's business.

In 2006, the company structure has been optimized by establishing two competence centres: While **Kufstein** (150 employees) is the location for digital printing machines and carpet machinery, the production site in **Klagenfurt** (250 employees) covers the industrial production of screen printing machines, coating machines, dryers and steamers.

In keeping the tradition Zimmer Kufstein has designed, delivered and installed more than **300 ChromoJET units worldwide**, and our satisfied customers have produced millions of meters of their products.

Through our **R&D departments** we stay in close touch with our customers' needs, problems and new ideas. Here, skilled application technicians are constantly working on new developments, new materials, new applications and new technologies. All this work is linked with the very good contacts to our partners in the textile, chemical and machinery industries.

Modular machine design is not just a word for us. It is the basic structure of all our machine designs. One of the outstanding characteristics of our machines is their immense flexibility. All systems are custom built from standardized elements in order to keep our manufacturing cost down and to give the customer short payback time due to a high R.O.I. factor.

Productivity is most important for every customer. Therefore all machine models are especially designed for fastest design change, shortest possible colourways and non-stop production.

Think global – act local. Customer service is one of our main objectives. Permanent availability via remote control service tools and on-site service is a must to satisfy our customers' requirements.

Austria is our homebase,
the world is our workplace.
